1. Claims 25-31 and 40-52 remain for examination.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 25-31, 40-45, and 52, drawn to a *memory system with memory clusters each multiplexing data to internal blocks*, classified in class 711, subclass 100.
 - II. Claims 46-51, drawn to a *memory system with multiple clusters each with buses coupled to bus state keeper*, classified in class 711, subclass 100.
3. The inventions are distinct, each from the other because of the following reasons: Inventions of *Group I* and *Group II* are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because *the invention of Group I can be used without the bus state keeper*. The subcombination has separate utility such as *use in a system without the multiplexing to internal blocks*.
4. Because these inventions are distinct for the reasons given above and the search required for one group is not required for the other group, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
